## COLLOIDAL DISORDER-ORDER TRANSITION-2 (CDOT-2) STS-95

CDOT Sample With Dendrites From STS-73

On the right is a photo of a CDOT sample taken during STS-73 with a magnified view of dendritic crystallites. On the left is the same sample in Earth's gravity. Dendritic crystallites have only been seen in this sample while in microgravity and have not been able to survive in Earth's gravity field.
